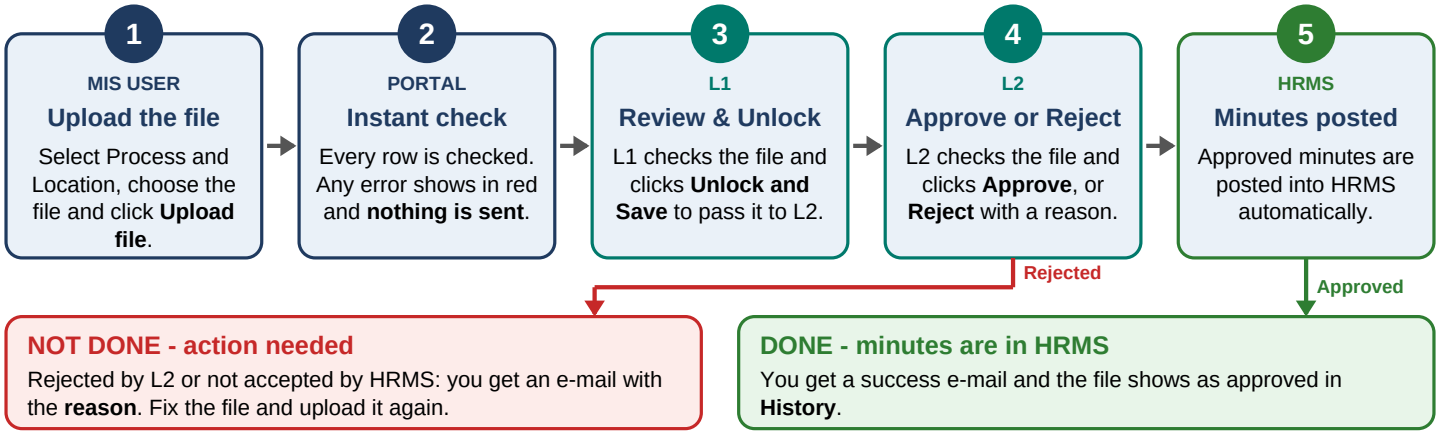
Downtime Portal

Workflow & User Guide

Send employee downtime to HRMS - checked and approved online

PART 1 - WORKFLOW

2 approvals before HRMS



PART 2 - USER GUIDE

What to do, based on your role

Login: use your username and password (**Forgot your password?** on the login page resets it). You only see the pages for your role.

MIS USER

Portal: http://172.20.122.231:8550/login/

1. Login with your shared username and password.
2. Select **Process**, then **Location**.
3. Choose the Excel / CSV file and click **Upload file**.
4. **Green** = sent to L1. **Red** = fix and upload again.
5. Track it in **Pending approval** and **History**.

File rules

- Columns: **EmpCode, Date, Minutes**
- EmpCode like **ATS4575**, from the chosen Process & Location
- Date **mm-dd-yyyy**, last 45 days, no future dates
- Minutes in whole numbers
- One row per employee per date, max **300** rows

L1

Portal: http://172.20.122.231:8550/login/

1. Login with your shared username and password.
2. Open **Files to mark**.
3. Click **View** to check the file.
4. Click **Unlock and Save** - it goes to L2.
5. Unlocked files are listed in **File Status**.

Note

A file can no longer be changed once L2 has approved or rejected it.

L2

Portal: http://172.20.122.231:8550/login/

1. Login with your shared username and password.
2. Open **Pending Approvals for Unlock Files**.
3. Click **View** to check the file.
4. **Approve** - posted to HRMS, or **Reject** - reason required.

Common error messages

File format is incorrect	Use exactly EmpCode, Date, Minutes	**Invalid date format**	Write dates as mm-dd-yyyy
Older than N days / Future Date	Remove those rows	**ATS ID not in Process / Location**	Pick the right Process and Location
Minutes must be integer	Use whole numbers only	**HRMS: already processed / locked**	Month is closed in HRMS
